13. What issues do you see in this area and how can you assist local districts in addressing school infrastructure needs in both SDA (Schools Development Authority) districts and regular operating districts? (answer type: Long Text)

We need to listen to the parents of our children for what the needs are in each school district. I have been to school board meetings and it seems to me that the boards I have visited have their own agenda.

14. As a legislator, will you support professional educators in their work with their students and avoid the temptation to mandate specific programs for every school district as we work to meet the individual needs of each student, school and district? How will you support the work of educators and principals in your district? (answer type: Long Text)

Yes I will support the workers as long as they are listening to the Parents as to what the needs are.

15. Do you believe New Jersey students should pass a state graduation test or demonstrate proficiency in math and language arts standards as described above to earn a high school diploma? (answer type: Long Text)

I believe that students have already proven they deserve a high school diploma as our teachers allow them to progress through each grade. Standardize testing is just that "Standardized" and does not meet the needs of every student. We are all individuals and learn in different ways.

16. As a legislator, what will you do to promote education as a positive career path to our youth and what types of initiatives will you consider to enhance the educational career pipeline for the future? How will you promote diversity within our future workforce? (answer type: Long Text)

We are already a diverse society, as to what I will do to promote the educational career path, this needs to be done by local educators as to why this path is best.

17. Will you vote for legislation (S-3284 (Greenstein)/ A-5011 (Wimberly)) that provides the same accidental death benefit to school employees who lost their lives in the service of their school community while performing such essential services? (answer type: Yes/No)

Yes

18. Thinking about the future, what are your goals for our public education system and what actions will you take as a state legislator to support our educators, our students and our schools? (answer type: Long Text)

I believe in school choice, and listening to what the needs are from both educators and parents at the local level.
